ABOUT ME

I am a full-stack web developer with 1 year of learning experience. My focus is on building both frontend and backend applications using TypeScript. Proficient in React on the frontend and Node.js on the backend. My skills include database management, API usage, and service integration. I believe the combination of my experience and knowledge can contribute to complex projects. Continuously seeking opportunities to grow and make meaningful contributions.

SKILLS & COMPETENCIES

- React Js
- NodeJs
- MongoDB
- Html & Css
- TypeScript
- Mysql
- Tailwind css
- JavaScript
- Chakra ui
- RestApi

WORK & EXPERIENCE

Batam, Kepulauan Riau

2022 - 2023

Developing skills in web development with JavaScript

Accomplishments:

- Implementing CRUD (Create, Read, Update, Delete) functionality for a task list.
- Using JavaScript, HTML, and CSS to create a responsive user interface.

Node.js and Express

- Learning the basics of Node.js and creating a server with Express.
- Integrating the server with a simple database for storing and retrieving data.
- Delving into the concepts of user authentication and security in web applications.
- Using token storage techniques to enhance application security.

Event Management Application

October 2023 - 2024 Januari

Led the development of a fullstack event management project using TypeScript, MySQL, and Tailwind CSS. Responsible for the entire software development lifecycle, from planning to implementation.

Frontend

- Designed and developed the frontend user interface using React and Tailwind CSS, with a focus on responsiveness.
- Utilized TypeScript to enhance code resilience and maintainability.
- Implemented interactive forms for adding and editing event details.

Frontend-Backend Integration:

- Ensured a solid connection between the frontend and backend through HTTP requests with fetch or axios.
- Handled state management and authentication across application layers.

Backend:

- Implemented the backend server using Node.js and Express, exclusively written in TypeScript.
- Configured and managed the connection to the MySQL database for event data storage.
- Built a RESTful API supporting CRUD (Create, Read, Update, Delete) operations for event entities.

EDUCATION

SMAN 4 TANJUNG PINANG 2019 - 2022

Purwadhika Digital Technology School 2023 - 2024

Udemy: Web Development

ACHIEVEMENT & PROJECTS

1. Robust Backend Infrastructure

Established a robust backend infrastructure using Node.js, Express, and TypeScript, ensuring secure and scalable data handling.

2. Responsive Frontend Design:

Established a robust backend infrastructure using Node.js, Express, and TypeScript, ensuring secure and scalable data handling.

3. Effective API Development::

Developed a RESTful API supporting CRUD operations, facilitating seamless communication between the frontend and backend.

4. Database Management Proficiency:

Demonstrated proficiency in managing MySQL databases, ensuring optimal data storage and retrieval for the event management system.
